

Clean Room Systems

The Only Clean Room Certified Crane System

Carpenter Crane Hoist's clean room hoists are made to fit any application. The clean room cranes are built for use in the hi-tech electronics environment. The unique design takes the structure of the crane and builds a clean room around it, creating a strong, Seismic zone 4 certified environment.

Custom Manufactured Freestanding Designs

- Clean rooms
- Clean room cranes
- Clean room cranes incorporated into clean room structures

Features of Clean Room Systems

- Clean rooms available in hard or soft wall styles
- Systems contain the only crane that is certified for clean rooms
- They are supplied in both underhung and top riding design for added flexibility
- All cranes are coated with thermal-bonded epoxy to control particulation. This unique coating is only available through Carpenter Crane Hoist.
- Clean room cranes are certified for Class 10 clean room environments
- Unique design between the clean room and the crane creates a safe, strong environment for production.
